FisherApp

Description

English

FisherApp is a platform which fishers can schedule fishings with their friends and save the data of their fished fishes.

Português

FisherApp é uma plataforma na qual pescadores podem agendar pescarias com seus amigos e salvar nela as informações de seus peixes pescados.

Technologies

- · Laravel (back-end framework)
- · Bootstrap (css framework)
- · Leaflet (for the maps in the platform / para os mapas na plataforma)
- MySQL/MariaDB (Database)

🚀 Run on your machine

Initial steps

```
$ git clone https://github.com/ruifernandees/fisherapp.git
$ cd fisherapp
```

Create database (MySQL/MariaDB)

```
CREATE DATABASE fisherapp;
```

Project setup

```
# Install PHP dependencies
$ composer install

# Install JS dependencies
$ npm install

# Run all migrations
$ php artisan migrate

# Run the UserSeeder seed, that creates some users
$ php artisan db:seed --class=UserSeeder
```

Run project

```
# Run the project
$ php artisan serve
# Run npm
$ npm run dev
```
